

## **ANALYSIS OF “FAKE NEWS” PROJECT OUTLINE**

Now that we have come to the end of our “Fake News” unit, you will be demonstrating what you have learned on how to evaluate information on the web for its accuracy and reliability.

Click the following link to access the article you will use to complete your project:

<https://childrenshealthdefense.org/defender/scientists-challenge-health-officials-on-vaccinating-covid/>

Using lateral reading **AND** “Ten Questions for Fake News Detection” evaluate whether the information in the article should be trusted.

To present your information, you will create a Google Slide presentation. Your presentation must discuss the **PROCESS** you went through as well as the **INFORMATION** you found. By the end, you need to write a well-developed paragraph explaining the validity of the article. Your paragraph must include **QUOTED INFORMATION** from sources you found during your investigation.

Presentation Outline:

- Introductory slide
- Middle slides with **WHAT** you found and **HOW** you found it.
- Conclusion slide

Assessed:

- accuracy
- process
- basic grammar and spelling
- use of quoted information
